## SCHIZOPHRENIA Factsheet

May 2016

### What is animal-assisted therapy?

Animal-assisted interventions use trained animals to help improve physical, mental and social functions in people with schizophrenia. It is a goal-directed intervention in which an animal that meets specific criteria is an integral part of the treatment process, which usually involves pharmaceutical and psychosocial treatment components. It has been shown to improve outcomes for people with autism-spectrum symptoms, medical difficulties, and behavioural problems. Here we present the evidence for animal-assisted therapies for people with schizophrenia.

### What is the evidence for animal-assisted therapy?

Low quality evidence is unable to determine the benefits of animal-assisted therapy for people with schizophrenia. Review authors report that it has potential for improving symptoms with few adverse effects.

For more information see the technical table

### HOW YOUR SUPPORT HELPS

We are able to make significant advances due to the generosity of countless people. Your donation allows us to continue to work towards transforming lives. For information on how you can support our research, phone **1300 888 019** or make a secure donation at [neura.edu.au/donate/schizophrenia](http://neura.edu.au/donate/schizophrenia).

**NeuRA**  
Discover. Conquer. Cure.

*NeuRA (Neuroscience Research Australia) is one of the largest independent medical and clinical research institutes in Australia and an international leader in neurological research.*

*Diseases of the brain and nervous system pose the greatest health, economic and social burden of any disease group because they are chronic, debilitating and have no known cures.*

*Medical research is the cornerstone of efforts to advance the health and wellbeing of families and the community. Our dedicated scientists are focussed on transforming their research into significant and practical benefits for all patients.*

*While we hope you find this information useful, it is always important to discuss any questions about schizophrenia or its treatment with your doctor or other health care provider.*
