## SCHIZOPHRENIA Factsheet

April 2019

### How are blood disorder related to schizophrenia?

People with schizophrenia may show increased rates of unrelated co-occurring conditions. These may include disorders of the blood, such as leukocytosis (excess leukocytes), hypokalemia (reduced potassium) or neutropenia (low neutrophil levels).

### What is the evidence for comorbid blood disorders?

Moderate to low quality evidence is unclear as to the prevalence of blood disorders in people with schizophrenia.

# NeuRA

Discover. Conquer. Cure.

*NeuRA (Neuroscience Research Australia) is one of the largest independent medical and clinical research institutes in Australia and an international leader in neurological research.*

*Diseases of the brain and nervous system pose the greatest health, economic and social burden of any disease group because they are chronic, debilitating and have no known cures.*

*Medical research is the cornerstone of efforts to advance the health and wellbeing of families and the community. Our dedicated scientists are focussed on transforming their research into significant and practical benefits for all patients.*

*While we hope you find this information useful, it is always important to discuss any questions about schizophrenia or its treatment with your doctor or other health care provider.*

For more information see the technical table

### HOW YOUR SUPPORT HELPS

We are able to make significant advances due to the generosity of countless people. Your donation allows us to continue to work towards transforming lives. For information on how you can support our research, phone **1300 888 019** or make a secure donation at [neura.edu.au/donate/schizophrenia](http://neura.edu.au/donate/schizophrenia).
