BIPOLAR DISORDERS Factsheet

April 2019

What is carbamazepine?

Carbamazepine is an anticonvulsant used primarily in the treatment of seizure disorders such as epilepsy. Anticonvulsant medications influence the actions of neurotransmitters leading to a decrease in brain cell (neuron) excitability. In bipolar disorder, carbamazepine is used mainly for the treatment of mania.

What is the evidence for carbamazepine as a treatment for bipolar disorder?

Moderate quality evidence suggests medium-sized effects of greater improvement in acute mania symptoms with carbamazepine than with placebo or topiramate, although there was a large effect of greater improvement in acute mania symptoms with tamoxifen than with carbamazepine. There was more discontinuation of treatment with carbamazepine than with olanzapine.

Low quality evidence is unable to determine the benefits of carbamazepine over placebo for acute depression.

For more information see the technical table

NeuRA

Discover. Conquer. Cure.

NeuRA (Neuroscience Research Australia) is one of the largest independent medical and clinical research institutes in Australia and an international leader in neurological research.

Diseases of the brain and nervous system pose the greatest health, economic and social burden of any disease group because they are chronic, debilitating and have no known cures.

Medical research is the cornerstone of efforts to advance the health and wellbeing of families and the community. Our dedicated scientists are focussed on transforming their research into significant and practical benefits for all patients.

While we hope you find this information useful, it is always important to discuss any questions about bipolar disorder or its treatment with your doctor or other health care provider.

HOW YOUR SUPPORT HELPS

We are able to make significant advances due to the generosity of countless people. Your donation allows us to continue to work towards transforming lives. For information on how you can support our research, phone **1300 888 019** or make a secure donation at neura.edu.au.
